

Council Request Update

December 7, 2017

Council Request: 17-151

Requested by: Mayor Jefferson

Request: Traffic at Belleview and Logan Street is significant. Can a 'no turn on red' sign be posted to help with accident avoidance at this location?

Assigned to: Public Works

Response: Please see the attached response from Traffic Engineer Ladd Vostry.

TO: City Council

THROUGH: Eric A. Keck, City Manager

THROUGH: Dave Henderson, Public Works Director

FROM: Ladd Vostry, Traffic Engineer

DATE: December 5, 2017

SUBJECT: COUNCIL REQUEST NO. 17-151

City Council requested information regarding the following:

Traffic at Belleview and Logan Street is significant. Can a 'no turn on red' sign be posted to help with accident avoidance at this location?

Belleview (S.H. 88) carries approximately 34,000 vehicles per day, an average traffic volume on Logan (a collector street) is about 7,000 vehicles per day. Nineteen crashes were recorded at this intersection over the eight-year span (2010 to 2017); only two crashes involved the southbound vehicles making right turn on the red indication going westbound.

Since the traffic signal at Belleview and Logan is maintained by Englewood staff as a part of Senate Bill 8 contract with Colorado Department of Transportation (CDOT), we have also contacted CDOT to solicit their opinion on this matter. Based on the available data, the recommendation from both parties (Englewood and CDOT) is to retain the existing traffic signal configuration at this time, continue to closely monitor the intersection operation and make any necessary adjustments if warranted.
