Englewood, CO 80110

Our Flow It Forward plan will repair and upgrade much of our 300 miles worth of water and sewer pipes. By doing so, Englewood homes and businesses will benefit for years—even decades—to come.

This plan will:

- Improve drinking water quality, reduce lead service lines, prevent failures and eliminate wasteful leaks.
- Lower sewer backups, prevent line collapses, shrink maintenance costs and properly redistribute water from treatment plants.

To implement these improvements, City Council will need to consider increasing rates starting in 2021. We anticipate the average monthly water and sewer rate will be around \$63.45, still significantly lower than our neighboring cities.

Average Monthly Water & Sewer Rates for Other Cities:

Castle Pines North: \$133.90	Lakewood: \$72.75
Parker: \$102.98	Aurora: \$70.57
Boulder: \$82.52	Englewood: \$63.45
Denver: \$73.13
