- **Parks, Recreation, Library and Golf**
  - The Englewood Community Garden is up and running for the 2024 season. On Saturday, May 4<sup>th</sup>, gardeners worked hard to get the three food bank plots ready to plant on May 18<sup>th</sup>, pull weeds and then work on their own plots. Plants for the food bank plots are donated and maintained by the

gardeners. In 2023, the garden donated over 350 pounds of vegetables to local food banks and patrons at the Malley Recreation Center. Gardeners will also donate excess vegetables from their own gardens to the food bank donations. The garden has 26 full and half plots, four ADA accessible raised beds and three food bank plots. There are more than forty gardeners who participate in the garden and this year the garden is excited to welcome Craig Hospital who will be taking two of the ADA accessible beds.

- This week the children's team held a graduation reception for four of the teens. Each teen was gifted a book "Be You" by Peter H. Renolds. These four are the reason the library started the teen programming (which has grown significantly) and together they have volunteered over 550 hours in the library!

- On Saturday, May 4<sup>th</sup>, the Englewood Recreation Center was the host site for the Denver Table Tennis Alliance's first Tournament of the year. Contestants spanning various age groups fiercely competed for the top position in their respective brackets, each vying to emerge as the ultimate champion. Englewood Recreation Center offers Drop-in Table Tennis as well as group lessons every Tuesday, Thursday, and Saturday.

- The reigning Colorado Senior Softball Association Champions, Englewood Malley Cats, won their 2024 Season Home Opener doubleheader on Wednesday May 8<sup>th</sup> against the Lakewood Cougars, 2-0. The Colorado

Senior Softball Association consists of teams across the front range for players 50 years and up.

- The Parks Department has begun installing the 5 Big Belly trash and recycling cans at Duncan, Belleview, Zoo Barn, Centennial and Bates parks.

- Volunteer at Broken Tee: Want to lend a hand? Join the Broken Tee maintenance team and help plant flowers around the course. We welcome volunteers on May 22<sup>nd</sup> and/or 23<sup>rd</sup>. Flexible times available.

- Protecting Our Wildlife at Broken Tee: Our resident eagles on hole thirteen have been making headlines! Featured in Westword, 9News, and Divot Magazine, these majestic birds have become local celebrities. Hole 13 has been converted to a temporary par 3 to safeguard our feathered friends!

- **Public Works**

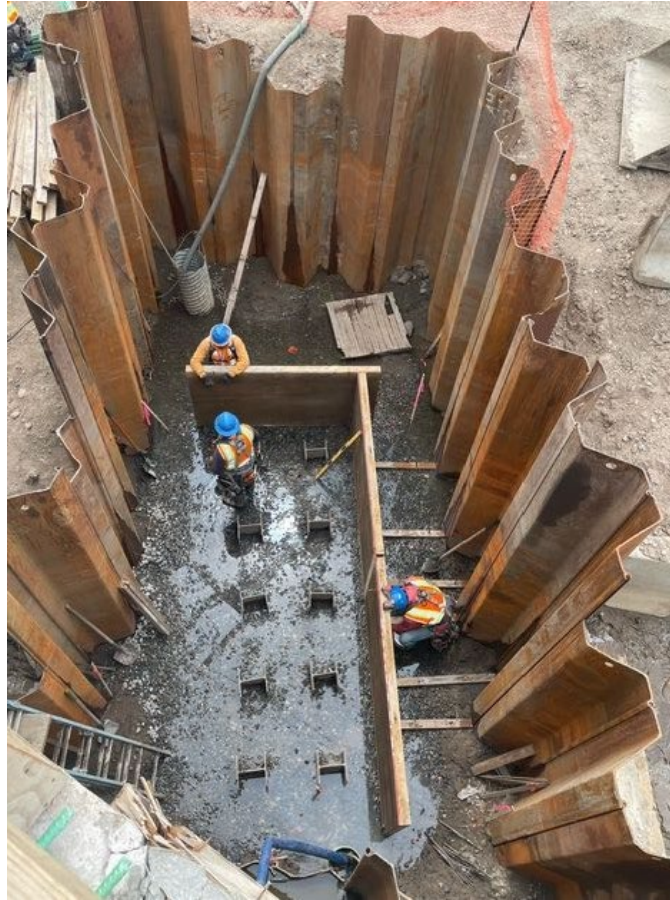

- South Englewood Flood Reduction Update:

- Site A: Work in the concrete section of the pipe is tentatively scheduled for the week of the 20<sup>th</sup>. The contractor will submit a traffic plan and secure a street occupancy permit.
    - Site B: Paving occurred this week on Quincy and Navajo. The intersection is now open, but Navajo will remain closed south of the intersection. Work is going to begin on Stanford late this week / early next to relocate the water line that is in the way of the tunnel. Utilities was consulted on some field adjustments. Once the waterline is moved, ACC will begin excavating for the tunnel.

- Dartmouth Bridge Update:

Last week the piles for Piers 3 and 4 were completed and the contractor is now forming up the pile cap and subsequently the pier wall. Those will be poured in the next two to three weeks. Please see photos below. Pier 2 and Abutment 1 work will be accessed from the west bank, and they will begin prepping that area for work in the next couple weeks which will include removing vegetation and creating a built-up soil platform for the crane to work from as to avoid damaging the trail. While this work is being completed the trail along the west side of the river will be fully closed to pedestrian and bike traffic with no safe option for a detour. Staff have been coordinating with South Suburban Parks and Rec and will keep them updated on the closure, as well as working with the COE communications team. With the delays caused by Xcel and the need to reconstruct a portion of our diversion we are estimating a completion of the project in Q4 of this year.

- **South Platte Renew**

- On May 1, 2024, Governor Polis signed HB24-081, marking a significant stride in Colorado's efforts to curb Perfluoroalkyl and polyfluoroalkyl chemicals (PFAS). Scheduled implementation includes disclosure requirements for PFAS in outdoor apparel by January 1, 2025, and bans on various PFAS products by 2026 and 2028. South Platte Renew (SPR) supported this effort through direct testimony in the State Senate and House Committee Hearings. The legislation was sponsored by Senator Cutter and Representatives Kipp and Rutinel, and demonstrated a collaborative effort among utilities, environmental, and health advocacy groups across the state.
- On May 9, 2024, SPR hosted a comprehensive tour for United States Bureau of Reclamation employees. The tour provided insights into the water renewal process and focused on SPR's biological phosphorus removal pilot project. This project is funded by a grant awarded through the Bureau's Pitch to Pilot program in late 2022. Such tours are instrumental in fostering collaboration, sharing knowledge, and strengthening partnerships essential for advancing sustainable water renewal practices.

- **Utilities**

- As a part of the Lead Reduction Program, the program manager continuously updates the Service Line Inventory Map as the material of service lines in the water service area is physically verified. This map is publicly available [here](#).
